Election/Restrictions

Applicant's election with traverse of species 1) enzyme = phosphatase, 2) targeting moiety = antibody, and 3) R¹ label = gamma emitter in Paper No. 3, filed 12 August 2002 is acknowledged. The traversal is on the ground(s) that the species are not patentably distinct. This is not found persuasive because: 1) the species of enzyme are classified into various subclasses under class 435, subclass 195, depending on the nature of the activity; 2) the targeting moieties are all vastly different in structure and activity and are classified in many different locations; 3) the labels are all quite different from chromophores and fluorophores to radioactive atoms and share no structural or chemical features in common.

The requirement is still deemed proper and is therefore made FINAL.

Applicant's election without traverse of the species of BLOCK = monovalent blocking group selected from phosphate or sulfate in Paper No. 3, filed 12 August 2002 is acknowledged.

Restriction to one of the following inventions is now required under 35 U.S.C. 121:

- I. Claims 1-3 and 5-20, drawn to method using endogenous enzyme, classified in class 514, subclass 75, for example.

Art Unit: 1651

- II. Claim 4, drawn to a method using gene therapy induced enzyme, classified in class 435, subclass 69.1, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions involve vastly different steps, to wit, the gene therapy requires creation of a vector, introduction of the vector into the target cells, and expression of the gene product before the enzymatic steps can be processed compared to the endogenous enzyme which is already available.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
